EDUCATION

BS in Software Engineering

Sir Syed university of Engineering and Technology
Oct 2022 - Oct 2026

PERSONAL PROJECTS

FINAL YEAR PROJECT

AI-Powered Retail Business Intelligence System
Sir Syed University of Engineering and Technology
Jan 2026 - Present

Tasks / Achievements

- Designed and built a full-stack retail management platform (React.js, Node.js, Express, PostgreSQL) featuring AI-driven demand forecasting, automated low-stock alerts, and Python/Flask ML microservices (Prophet, scikit-learn) for sales forecasting and product placement optimization, visualized through interactive React dashboards (Recharts, Chart.js) with confidence-interval forecasting.

To Do List

Frontend

Key Features

- Responsive BMI calculator (HTML, CSS, JS) that computes BMI from height/weight input and displays a personalized weight guide.

WORK EXPERIENCE

FRONT END DEVELOPER

Sofject
Aug 2025 - Present

Achievements/Tasks

- Enhancing front-end development skills with a focus on React.js, JavaScript, and modern UI frameworks.
